

Lets take a part to support our local fishermen

We are delighted and proud to announce about your participating in giving back to our fishing communities by buying our product. In the middle of January 2019, Bali Sustainable Seafood, has donated ocean style hand held GPS to our tuna fishermen in Seram Island. As we know the GPS is a technology that help fishers when they go fishing in the wide of Indonesian waters. Such as help them to find a right position to catching fish and help the fishers when they back to their fish landing site, especially in bad weather conditions.

A huge thank you to all of you our loyal customer: without you this is would not be happened. You are such an important thing to us with taking a part to support the local economic by buying Bali Sustainable Seafood Products. Hopefully, we always working together and fully support the sustainable program and the fishing communities that supply our fish. Not only support the local economy and also protect Our Ocean, endangered species and habitat.
